

TroopMaster Startup - Update Setup

Start Troopmaster by double-clicking the TM icon.

On startup, the program gives you a notice that there is no data file present and wants to know more. Click "NO"

Go to "File/Preferences"

In the requestor, ensure:

- "Display tips on startup" = UNchecked
- "Use large toolbar buttons" = UNchecked
- "Omit completed MB's..." = UNchecked
- "Prompt for MB Counselor..." = UNchecked
- "Prompt for Data Backup" = UNchecked
- "Save location of report.." = Checked
- "Use formal name..." = Unchecked
- "Include area code in reports" = Checked
- "Prompt for data access password on startup" = Unchecked
- "Include Mic-O-Say on Menus" = UNChecked
- "Automatically Check for newer version" = checked

Click "OK" to close this requestor

Go to "File/TroopMaster DotNet"

Enter or check/uncheck as follows: "Activate TroopMaster DotNet" = Checked
Server: dotnet.troopmaster.com (use dropdown)
Port = 21: You can't change this!
User ID Enter: "024034T" (Case sensitive!)
Password = "A1ECF09FY" (Case sensitive!)

Click on "Data **Encryption** Password". If blank: enter "grfd205" then click "OK"

Enter or check/uncheck as follows:

- "Prompt to download at startup" = "Always download"
- "Prompt for Read-only on startup" = "Prompt for Read-Only"
- "Unlock database when exiting" = "Always upload/unlock"
- "Download Photos" = Never
- "Upload Photos..." = Never

Enter your contact info.

Click "OK" and the program will try to download the data files. You will get an error...

Enter under "Data **ENCRYTION** Password": "grfd205" Click "OK"
(This allows TM to get the file from the server)

You will get another error...

Enter under "Data **Access** Password": "**YOUR individual Access password**. Click "OK"
(If you don't know yours, call or email me)

Call me (Greg) at 581-3930 if you have a problem!
